Our vision:

To be Marine Transportation, Stevedoring/Surveying, Environmental, Fabrication, Construction, Oil & Gas Engineering Services provider of choice.

Our Mission

To deliver cost-effective with consistently high quality that add value to our client's business.

Our Strategy

To combine crack team of fabrications and engineers to develop young Nigerian engineers and artisans through challenging experiences and assignments while completing our mission.

Our activities:

Fabrication, Pipeline Installations, Structural Steel Fabrication and Erection, Storage Tank Design and Construction, Stevedoring, Marine Services, Oil Spill Clean-up, Procurement and Logistics, NDT Services, Blasting and Painting, Maintenance, Personnel Supply, Engineering Consultancy, Oil & Gas Services.

Scope of Services

1. WELDING AND FABRICATION SERVICES

- Sawing, Shearing, Plasma and Laser Cutting
- Custom Die Forming
- CNC Punching and Braking-Sheet Metal to Heavy Plate
- Product Welding and Assembly
- Industrial Painting
- Engineering
- Custom Design
- Burning
- Finishing

FINISHING SERVICES INCLUDES:

- NDT
- Sand Blasting
- Painting
- Grinding and Polishing

2. STRUCTURAL STEEL FABRICATION AND ERECTION

Local procurement of structural steel, fabrication and erection of steel structures such as warehouse, generators and compressor shed and workshops

3. STORAGE TANK DESIGN AND CONSTRUCTION

Taking off from the volume of storage to determination of the tank dimensions, shell plate thickness, roof plate thickness, shell courses and other appurtenances to detail fabrication drawing of the tanks for construction in accordance with the applicable code and standards.

4. ENGINEERING CONSULTANCY SERVICES

Preparation of comprehensive design specifications, drafting and as-built drawings, drawing and procedures which are used directly for procurement, construction and commissioning of the production assets. Preparation of specifications for materials and equipment procurement support to project commissioning and start-up. Again, key decision factors are safety, reliability, life-cycle cost minimization, protection of environment and security.

5. MAINTENANCE SERVICES

Maintenance and services of plant and equipment is also given a professional touch by our team of seasoned equipment's maintenance professionals. Heavy duty equipment and plant machineries' general maintenance services are carried out with much regards to safety and quality.

6. PROCUREMENT/LOGISTICS

Procurement of products and services are done within the Nigerian markets if local and if foreign, the applicable laws of the Federal Government are strictly adhered to in the course of transferring the products/services to the country.

QUALITY POLICY STATEMENT

Hazak's Engineering Limited provides engineering, fabrication, construction and consulting services to clients that are primary operators in the upstream and downstream sector of the petroleum industry and chemical process industry in general. The nature of the Company's services places particular emphasis on expertise reliability, performance and quality.

It is Hazak's Engineering Limited policy to render to its Clients innovative engineering design and consultancy services and other technical services of consistently high quality that meet or exceed the Client's requirements and expectations at all times, and add value to the Client's business.

Our services shall be consistent with public good and shall comply with all applicable existing laws and regulations.

Hazak's Engineering Limited shall ensure that management and all personnel of the company are fully conversant with the company's objectives through an in-house training programme for personnel at all levels within the company.

Hazak's Engineering Limited Quality Management shall meet the requirements of international industry best practices and standards.

Managing Director/CEO

HEALTH, SAFETY AND ENVIRONMENT (HSE) POLICY STATEMENT

Hazak's Engineering Limited regards the promotion of good health, safety and environmental preservation measures as a mutual objective for management, staff and visitors to the company.

It is Hazak's Engineering Limited policy to ensure, as far as is reasonably practicable, the health, and safety of all employees and prevention of injuries to them whilst at work and give proper consideration to the protection of the environment.

Hazak's Engineering Limited will take all reasonable steps within its power to discharge its responsibilities to:

- Provide and maintain safe and environmentally conducive working conditions that meet or exceed all statutory requirements.
- Provide training, instructions and information to enable employees to perform their duties safely and efficiently.
- Provide all necessary safety and protective equipment to staff, and
- Maintain workplaces in a condition that is safe and without risk to health or the environment.

Everyone is required to conform to this policy. All company employees are hereby informed that they have a legal responsibility to take reasonable care for the health and safety of themselves, their colleagues and any visitors to company premises, and worksites.

Managing Director/CEO

TECHNICAL ALLIANCING

Our corporate strategy to achieve our mission is to continually improve the technical skills of our staff, our key resources, by giving them hand-on practical experience under supervision of experts in particular disciplines.

Alliances may take several forms. It may be straight technical partnership with both partners retaining their separate independent corporate identities, and cooperate only on project-by-project basis, either exclusively or otherwise.

It may take the form of exclusive representation in country, or it may be an incorporated joint venture. In all cases, the primary objective of Hazak's Engineering Limited will be to secure more advanced technological knowledge or skills from the foreign partner. This alliance is in view.

WHO WE ARE

Incorporated in 2016, Hazak's Engineering Limited comprises of young, dynamic engineers, administrators and accountant with various experience in their respective field of operation ranging from 19 years and above in services in oil and gas industry.

These young and dynamic youth come together to put their various experience to bear with the formation of Hazak's Engineering Limited to provide competitive cost, reliable quality goods and services to her clients and projects. Headquartered in Lagos Nigeria, we provide a range of Oil & Gas Engineering, Design and Consultancy services.

With a track record of over 10 years, Hazak's Engineering Limited has built a reputation based on her service reliability, commitment to accountability and value-added to the customer's operations. Indeed the hallmarks of our services are Safety, Quality Workmanship and Engineering Excellence. This has resulted in our dynamic growth and rapid extension of services within and beyond the Nigerian Oil, Gas and Allied Sectors of Industry.

Our strategic alliance and continuous emphasis on training and technology acquisition have resulted in a wealth of locally-available global skills and engineering expertise.

Our strategy is to be a full service provider to the energy, Oil and Gas industry. We are able to offer our services in a stand-alone or an integrated manner thereby presenting our customers with a distinct value proposition.

Our people are critical to achieving our mission. We thus place a high value on ensuring that our employees are well trained and recognized for their capabilities.

Our culture encourages innovative ideas, team work, an entrepreneurial spirit and commitment to continuous improvement in everything we do.

Our people recognize the value we place on their person and services, and reciprocate by their diligence, dedication and commitment to growth of the company and customers business.

At Hazak's Engineering Limited, we seek to attract and retain the best talent by providing them with a great work environment and the opportunity to maximize their potentials within the organization.

Hazak's Engineering Limited offers a range of multi-discipline engineering and technical services to the Nigerian Oil & Gas industry.

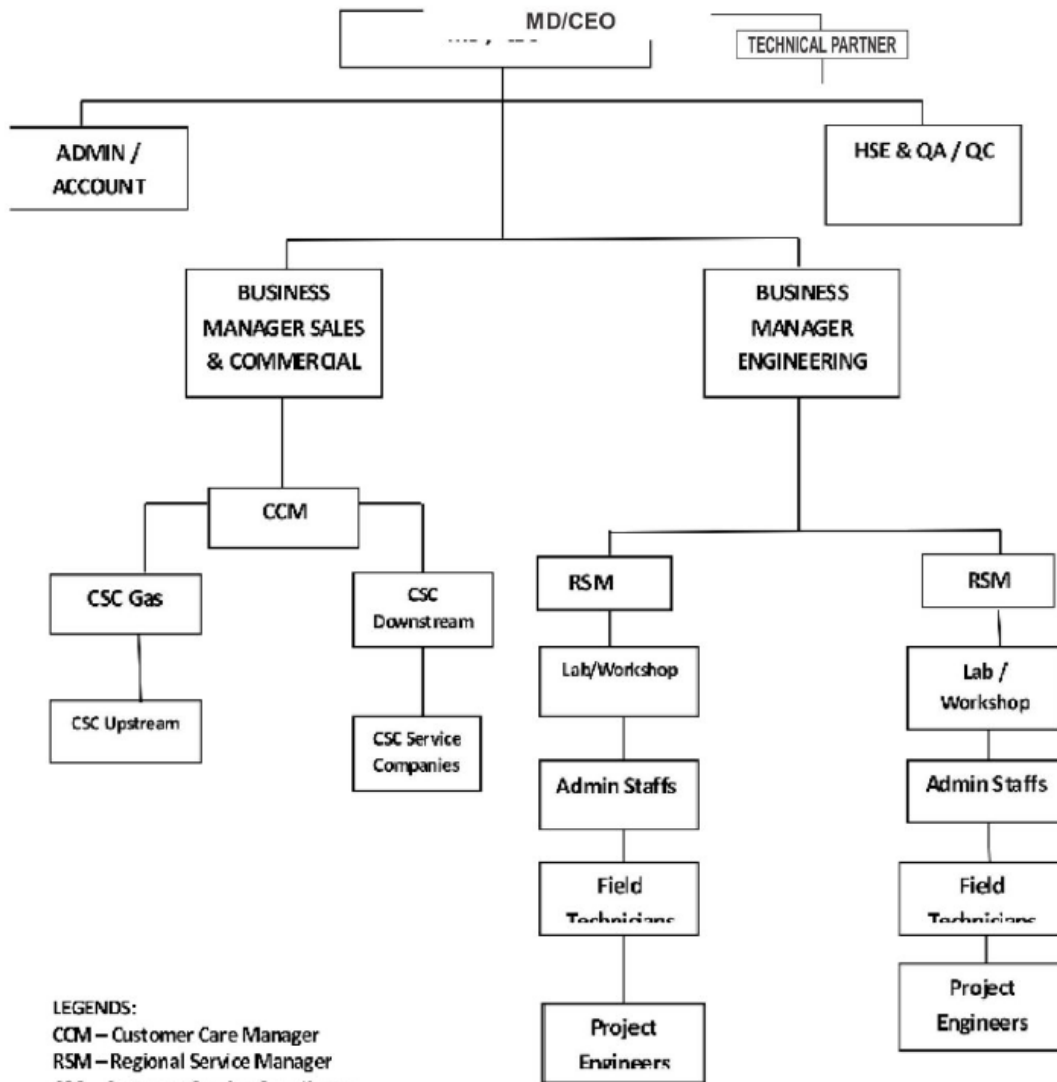

These experiences include but not limited to the following:

- Erection of Steel Structures
- Stevedoring/Survey
- Storage Tank Construction
- Storage Tank Design
- Marine Transportation
- Drafting
- Basic Engineering Design
- Project Supervision
- Project Management

- Equipment Maintenance
- Local and foreign Procurement
- Labour Supply and Human Resources Management
- Natural Gas Pipeline Construction/Reticulation Piping
- Natural Gas Pipeline using PE pipes and fitting.

At Hazak's Engineering Limited, we recognize that our business is structured around reducing the overheads of the industries we service, enabling them increase their efficiency and capacity utilization, thus making more employment opportunities available to the indigenes of the area. We thus work tirelessly and in close association with our customers to facilitate their smooth and profitable operations, with the end sight of benefit to the host community, Lagos State and indeed Nigeria as a whole.
